- Landowner: \$326.36

Practice:

Grassed Waterway

Benefits:

Eliminate 2.5 tons of soil erosion per year.

Partners:

North Cannon River WMO

Watershed:

Cannon River

Sub-Watershed:

Trout Brook

Finished and seeded grassed waterway

Project: Construct a grassed waterway to eliminate the gully erosion. The grassed waterway design is 1,400' long by 35' wide. The project will help reduce 2.5 tons per year of soil erosion.

2009

Gene Kimmes

Grassed Waterway

Gully erosion on north side of grassed waterway. Waterway was filled in and water was not entering into grass area.
